HIV

1.2 million
people in the U.S. are
living with HIV today.⁶

4 in 10 are unaware
of their infection.²

The CDC recommends that everyone age 18 and older get tested for HCV at least once in their life, and those with ongoing risk factors get tested regularly.³

- More than 70% of new HCV infections can be attributed to injection drug use among younger generations.⁴
- Approximately 74% of baby boomers have never been tested or are unsure if they have been tested for HCV.⁵
- HCV infection becomes chronic in approximately 75-85% of cases.¹

OraQuick[®] is a single use, qualitative platform with immunoassays for the detection of antibodies to Human Immunodeficiency Virus Type 1 (HIV-1) and Type 2 (HIV-2), and Hepatitis C Virus (HCV).

1 in 7 are unaware
of their infection.

The CDC recommends that everyone between the ages of 13 and 64 get tested for HIV at least once in their life as part of routine health care, and those with specific risk factors get tested every 3-12 months.⁷

- Individuals who are unaware of their infection account for almost 40% of HIV transmissions.⁸
- Nationally, less than 30% of people in the U.S. most at risk of acquiring HIV were tested in the past year.⁹
- Fewer than 40% of people in the U.S. have ever had an HIV test.

Fastest way to a healthier community

Rapid point-of-care testing

OraQuick® is a rapid point-of-care (POC) platform that is easy to use and can detect infection in any setting.

MEDICAL CLINIC

Accurate
results

OUTREACH

UNIVERSITY

Ideal for both clinical and non-clinical settings, POC testing can be conveniently performed and provides immediate results.

POC testing helps you increase public access to prevention services and link infected individuals to care faster and improve health outcomes.

HOSPITAL

Cost-efficient

Reduces indirect costs and improves turnaround time; thereby increasing productivity

Accurate results

Yields accurate results in a matter of minutes, leading to earlier detection and prevention of onward transmissions

Optimizes every single visit

Helps guide treatment decisions and care pathways
